PROFILE SUMMARY

Information Technology student passionate about software development. Proficient in algorithms (LeetCode: 1548) and skilled in the MERN stack and Google Cloud Platform. Committed to learning and contributing to meaningful software development projects.

EDUCATION

2021-2025
MADHAV INSTITUTE OF
TECHNOLOGY & SCIENCE
Btech (IT)

2020 - 2021
SILVER BELLS HIGH SCHOOL
XII (CBSE)

2018 - 2019
INDIAN SCHOOL SOHAR
X (CBSE)

INTERNSHIPS

Qualyval Ltd
SDE intern

MAY,2024 - PRESENT

- After training on Slack and Google Cloud Platform, I completed web scraping projects to track real estate price and sale status changes.
- I created a lead generation pipeline to scrape company and employee data, hosted it on Google Cloud Functions, and automated it with Cloud Scheduler. Additionally, I set up a CI/CD pipeline using GitHub Actions and wrote tests with Jest.

PROJECTS

BloodStream

Developed a user-friendly web app to streamline blood donation using the MERN stack and Redux.

- **Donor Features:** Quick registration, profile management, and appointment booking.
- **Staff Tools:** Efficient blood unit creation, real-time inventory tracking, and automated confirmations.

Excel Clone

Created a lightweight spreadsheet app with pure HTML, CSS, and JavaScript.

- **Features:** Add, view, edit, and delete entries easily along with customizations for fonts, colors and more.
- **Functionality:** Supports multiple pages and offline storage for anytime, anywhere access.
